WELCOME TO VEROPE

verope® was founded in 2004 as a Joint Venture company between myself and Kiswire Ltd. Since then, verope® has grown significantly and many things have been improved. We remain committed to our promise that you can rely on verope® and its high quality special wire ropes and service.

Over the years we have had many opportunities to prove ourselves as reliable partners for our clients' projects and I know that our special wire ropes will continue to prove their enormous performance and reliability in demanding crane applications all over the world for many years in the future. I am proud of our employees and their dedication to providing excellent and improved products and service year after year. Thank you for trusting verope®!

The future may hold uncertainties, but our goal at verope® to develop and move forward remains constant. Our focus is not only on improving our special wire ropes, but also on what kind of company verope® will be in the future.

We are aware of our responsibility towards our planet and making verope® sustainable is a long-term goal that we are pursuing step by step and will continue to do so in the future. In this brochure, we proudly present our company portrait, our current locations and look forward to the future with hope and confidence. We will continue working hard to provide the best possible service for our customers, for future projects, for the environment and for future generations. We invite you to accompany verope® on this journey!

Pierre Verreet, CEO

Thierry Verreet, DMD

VEROPE WHO WE ARE

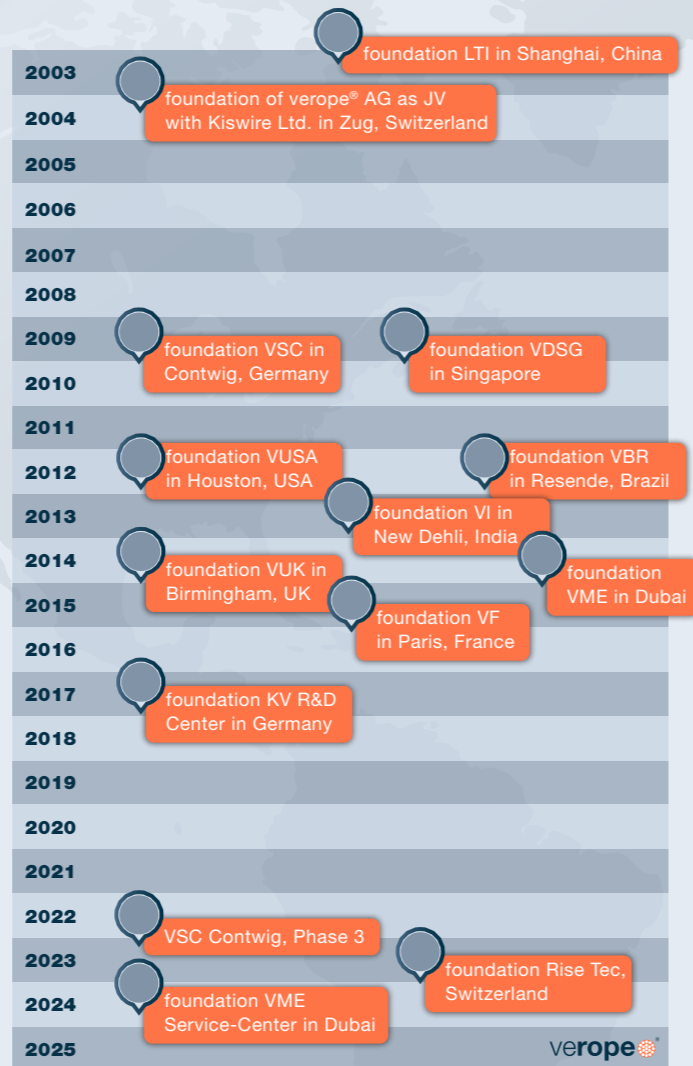

ABOUT US

VEROPE® MERGES CUSTOMER DEMANDS FOR TOP QUALITY AND COMPETITIVE PRICING IN PRODUCTION, SALES, DISTRIBUTION AND SERVICES OF SPECIAL WIRE ROPES WITH A TRUE GLOBAL REACH.

verope® AG is a Joint Venture company between Pierre Verreet, head and founder of verope®, and Kiswire Ltd. from South Korea. The combination of verope's exceptional expertise in the special wire rope market and Kiswire Ltd.'s long experience in efficient production makes verope® a partner you can rely on.

In our factories we produce approx. 30,000 tons of special wire ropes per year, our R&D centers in Germany and Korea design and develop state-of-the-art special wire ropes, making us a preferred supplier to many market-leading companies worldwide. With 13 locations worldwide, the verope® group of companies provide exceptional services to customers and partners in more than 62 countries.

INDUSTRIES

Within 20 years of veropes® history, we became a high-quality solution provider for special wire rope applications in different industries. verope® products are utilized in 300 ports worldwide and in 67 steel mills. Additionally, 2,500 container ships are equipped with high-quality verope® ropes. 19 deep shaft mines benefit from the outstanding performance of verope® products. Furthermore, 365 different crane models have been trusted by original equipment manufacturers to rely on verope® for their operations.

OFFSHORE

OFFSHORE INDUSTRY – We offer outstanding ropes, end fittings and services that meet the complex high-performance requirements of the offshore industry.

DECK CRANES

DECK CRANES – The majority of the world's commodities are transported by the shipping industry, making efficient and reliable equipment crucial for world trade.

STEEL

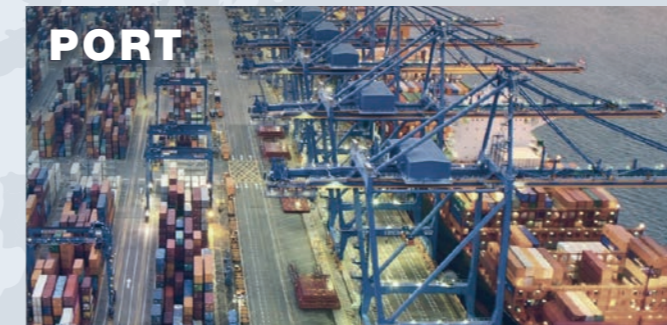

HEAVY INDUSTRY – Cranes play an important role in the heavy industry where handling large and heavy goods is necessary for optimal productivity and logistic.

DISTRIBUTION

ALPS – provides quality products and services for industries like Elevator, Marine, Construction, Automotive, Rigging, Yachting and others in North America.

PORT

PORT INDUSTRY – Ports are the gateways for trade and their efficient, reliable operation are key factors in success.

ELEVATOR

RISE TEC – specializes in high-quality elevator ropes, combining expertise and extensive R&D activities to ensure top safety and durability standards.

CONSTRUCTION

CONSTRUCTION INDUSTRY – The construction industry is more complex than ever, and the performance demands are constantly increasing and pushing boundaries.

MINING

MINING – We combine good old fashioned engineering with state of the art improvements to provide you excellent ropes. Clients trust verope products to carry precious loads – at highest safety and performance levels – all over the world, day after day.

VEROPE

WHAT WE OFFER

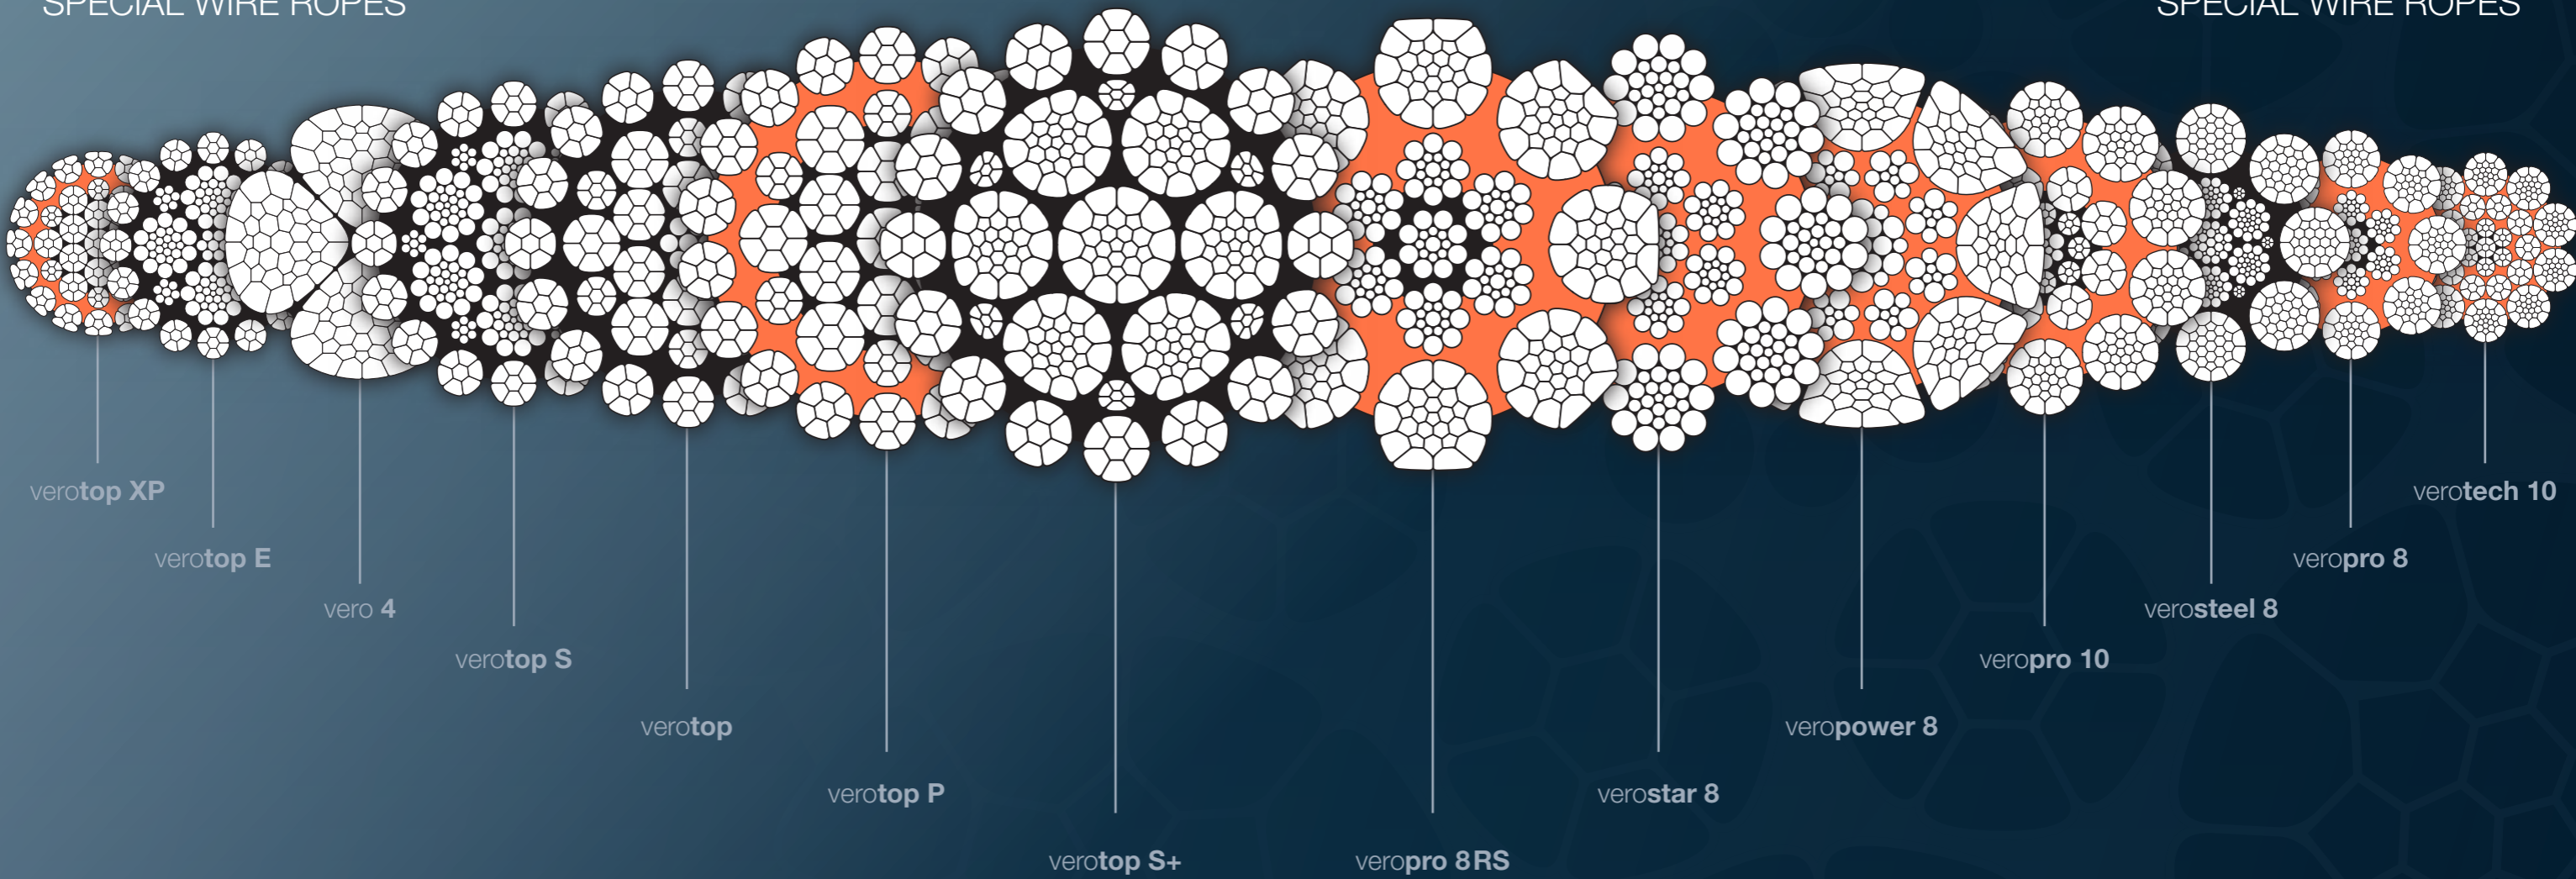

VEROPE SPECIAL WIRE ROPES

verope® offers the highest quality in special wire ropes, engineering, and after-sales service. From the design phase to wire drawing, stranding, and final special wire rope manufacturing, verope® applies the highest quality standards. By meticulously controlling and continuously optimizing every single step in special wire rope manufacturing, we create a product you can rely on.

Our rotation- and non-rotation-resistant special wire ropes offer a dedicated solution for your application; with a stable rope structure, superior crushing- and abrasion resistance, highest breaking strength and superior spooling behavior - verope® products offer the highest level of safety and optimum service life.

ROTATION-RESISTANT SPECIAL WIRE ROPES

NON-ROTATION-RESISTANT SPECIAL WIRE ROPES

SPECIAL SERVICES

At the heart of the verope® service strategy lies reliability and consistent innovation with a true global reach. This is achieved by focusing on the most valuable asset of any company – its employees and partners all over

the globe. This ever-expanding verope® team remains your reliable partner to advise and support you on the best and most competitive rope construction for your application.

SERVICE CENTER

With our global network of qualified distributors and six service centers worldwide, we ensure that we are always close to our partners. The verope® service center concept offers efficient high-quality processing, excellent product availability, engineering and also after-sales services to guarantee superior customer satisfaction. Our local experts offer technical support, on-site inspections and customized training at the verope® rope academy to verope®, RiseTec and Alps partners.

TECHNOLOGY

We offer development and testing services with a focus on special wire rope, fiber ropes and rope technology solutions.

Out of the box, we provide outstanding engineering support to rope enthusiasts worldwide. To make sure our verope® special wire ropes are the best solution not only today but also tomorrow we started the future.

TEST BOX, INNOVATION BOX, APPLICATION/CALCULATION BOX, and MAGIC BOX – offer specialized services for rope and wire testing, innovation and development, lifecycle analysis, and tailored solutions for individual requirements.

- Innovative marketing support

With our partners, we built bridges in New Zealand, embarked Caribbean ports, detected palladium in South Africa, and even took a catapult to the moon

NEVER STOP MOVING

We will continue to grow the family of verope® partners. We look forward to new and challenging projects in the world of special wire ropes. We are prepared for the future and invite rope enthusiasts worldwide to join our journey.

WHAT ABOUT TOMORROW

SUSTAINABILITY PHILOSOPHY

Protecting our environment has always been a topical issue, but never before has it been as urgent and relevant as it is today. At verope®, we strive for consistent sustainable corporate management in all areas.

GENERAL

We are committed to continuous improvement in environmental protection and performance in all areas of the company, both in our operations and in the way we conduct business in an environmentally friendly manner. This attitude applies to the entire verope® group and all subcontractors.

COMMUNICATION

The goals we want to achieve are made available to all verope® employees. In external communication, we work openly and actively with all interested parties and strive for an honest and trusting relationship. Our convictions and strategies, as well as goals and successes, are made accessible to the public and communicated externally.

LEGAL

We are committed to full compliance with relevant legal standards, requirements and other guidance. This is monitored through regular audits.

PARTNERS

We choose suppliers and subcontractors based on appropriate environmental standards and beliefs and ensure that they meet our expectations. We support these external suppliers in their efforts to protect the environment and are committed to using eco-friendly, resource-efficient products.

FRAMEWORK & REQUIREMENTS

Unnecessary emissions are avoided and unavoidable ones are minimized. Clear environmental targets with realistic timeframes are set and followed. All processes are regularly optimized and all facilities are maintained to ensure smooth, effective and environmentally friendly operation - in all processes and areas of the verope® group. This compliance is also constantly monitored and controlled by appropriately responsible persons.

CONTINUOUS IMPROVEMENTS

verope® products are manufactured with a commitment to four sustainability objectives:

- ethical business and labor standards
- workplace safety
- cultural promotion and community contribution
- environmental protection.

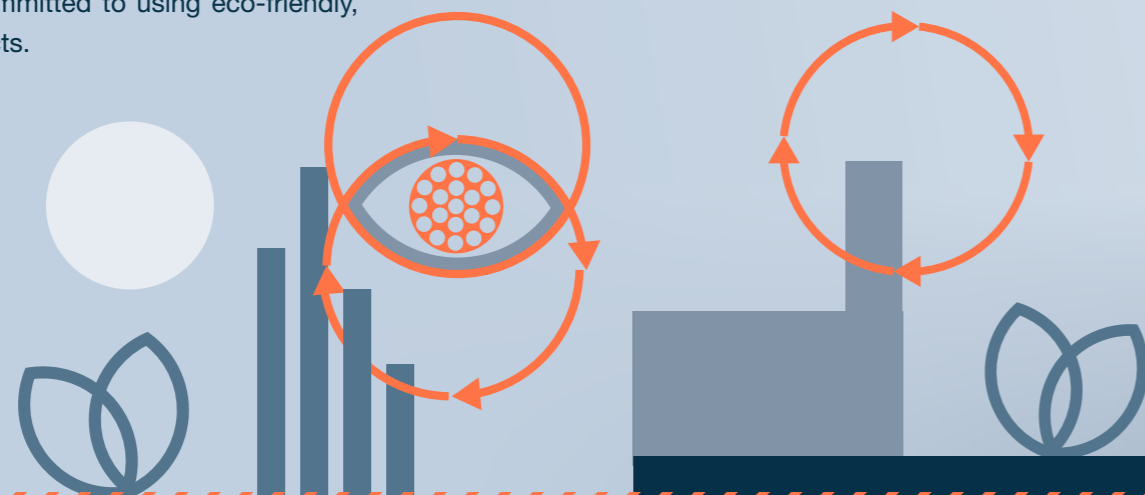

All manufacturing plants were audited and approved for ISO45001 in 2019 and all Korean factories are certified in accordance with ISO 14001 standards.

The majority of production sites are equipped with solar panels, and the verope service center can cover up to 100% of its power consumption with solar energy.

In different factories environment protection initiatives helped to reduce waste per ton produced by 25% within 3 years. Carbon emission was reduced for 5 consecutive years and since 2017 energy consumption in these factories was reduced by 9.9%.

Acting sustainably is a natural step for a family-owned organization. The next generation is a crucial element in our long-term strategy, and we will continue to contribute for generations to come.
